Profile Summary

Experienced **Full-Stack Developer** with **2+ years** of hands-on expertise building scalable **web, mobile, and desktop applications**. Core team member at a product-based startup, contributing across the full stack — from React and Node.js services to React Native mobile apps and Electron.js desktop tooling. Skilled in clean architecture, microservices, and cloud integrations. Passionate about shipping reliable products and continuously raising the bar on engineering quality.

Technical Skills

- **Languages:** JavaScript, TypeScript, HTML, CSS
- **Frontend:** React.js, Next.js, Tailwind CSS, Material UI, Redux, TanStack Query
- **Mobile & Desktop:** React Native, Expo, Electron.js
- **Backend:** Node.js, Express.js, REST APIs, Socket.IO, WebRTC, gRPC
- **Databases & Caching:** MongoDB, MySQL, Firebase, Firestore, Redis
- **Cloud & DevOps:** AWS (S3, CloudFront, EC2), DigitalOcean, Docker, Kubernetes, Nginx, CI/CD
- **Messaging & Tools:** RabbitMQ, Git/GitHub, Postman, Vercel, Render, Netlify
- **Architectures:** Microservices, MVC, Clean Architecture
- **Integrations:** OpenAI GPT API, Razorpay, Stripe, Cloudinary, Nodemailer, Multer

Professional Experience

Full Stack Developer, Solkuu — *GrabLocal*

July 2025 – Present

- Core team member building **GrabLocal** — a curated marketplace and seller operating system that connects Indian consumers with premium homegrown brands, offering same-day delivery, AI-powered recommendations, and a zero-commission seller model.
- Developed and maintained the **seller CRM frontend** (React.js / Next.js) covering real-time order management, inventory tracking, payment reconciliation, and seller dashboards.
- Built backend APIs and services with **Node.js / Express.js** for order processing, seller onboarding, inventory sync, and delivery management.
- Delivered the seller-facing **React Native mobile application** enabling on-the-go order and inventory management for sellers.
- Engineered an **Electron.js desktop application** that listens for incoming platform orders and automatically triggers receipt printing at the seller's end — enabling zero-touch, real-time order fulfillment.

Software Developer, AffWorld Technology

May 2024 – May 2025

Certificate

- Led development of a **Real Estate CRM application** (React Native / Expo) featuring property and vehicle listing, agent dashboards, and lead management tools for real estate businesses.
- Engineered a scalable **property rental platform** with dynamic host/guest roles, file-based navigation via **Expo Router**, and secure online payments powered by **Stripe**.
- Developed a **client service and subscription app** enabling users to browse plans, pay via **Razorpay**, and track project progress in real time.
- Implemented full authentication flows including session management and role-based access control.
- Collaborated with UI/UX designers to build responsive, production-quality interfaces, and ensured app performance through code reviews and reusable component design.

Projects

HireHub — Job Portal

 repo  live

React.js, TypeScript, Tailwind CSS, Redux, Node.js, Express.js, MongoDB, RabbitMQ, gRPC, Docker, Kubernetes

- Built a job portal on a **microservices architecture** for scalability and independent deployability.
- Features include **infinite scrolling**, **real-time chat** (Socket.IO), **video calls** (WebRTC), and **search debouncing**.
- Implemented secure **JWT-based** authentication and admin controls for managing users, recruiters, and reported content.
- Applied clean architecture principles for maintainable, testable code across services.

TimeZone — E-Commerce Platform

 repo  live

Node.js, Express.js, MongoDB, EJS, Razorpay, AWS, Nginx

- Built an e-commerce platform for rustic watches with a scalable MVC backend.
- Integrated **Razorpay** for secure payment processing and **Nodemailer** for email verification.
- Handled image uploads with **Multer** and deployed on **AWS** behind **Nginx** for reliability.

Netflix GPT — AI Movie Recommendation Platform

 repo

React.js, Firebase, OpenAI GPT API, TMDB API

- Netflix-like platform with **AI-powered personalized movie recommendations** via OpenAI GPT.
- Firebase authentication, multi-language support (English, Malayalam, Hindi), and TMDB API for dynamic content and trailer previews.

Aadhaar OCR — Document Parsing System

 repo

React.js, TypeScript, Express.js, Tesseract.js

- Parses Aadhaar card details (Name, Number, DOB, Gender, Address) from uploaded front/back images using **Tesseract.js**.
- Secured with **rate limiting** and **Helmet.js**; client and server-side validation with clear user-facing error messages.

Product Listing Platform

 repo

React.js, Firebase, Firestore, Context API

- Marketplace for listing and selling products with Firebase authentication, Firestore real-time database, and Context API state management.

Certifications

Masterclass: Fundamentals of Docker & Kubernetes — Udemy [View Certificate](#)

Education

Bachelor of Computer Applications (BCA), University of Calicut

June 2020 – April 2023

MERN Stack Development, Brototype — Bangalore

Aug 2023 – April 2024
